SUMMARY

Cybersecurity student (AAS, 3.96 GPA) pursuing a Tier 1 SOC Analyst role. I run a home-built SOC lab using Splunk, Wireshark, SNORT, and Nessus, and spent 2026 supporting IT and security operations across 43 Carroll County Public Schools sites, handling account security, device compliance, and high-volume Tier 1 troubleshooting. Comfortable across Windows and Linux environments.

TECHNICAL SKILLS

Security Operations & SIEM: Splunk log analysis and alert triage, IOC validation, MITRE ATT&CK mapping, false-positive review

Network Security: TCP/IP, VLANs, NAT, DHCP, Wireshark packet analysis, Cisco routing & switching

Threat & Vulnerability Tools: Nmap, Nessus, SNORT, Metasploit, Burp Suite, Hashcat, Aircrack-ng

Systems: Linux (Kali, Parrot, Ubuntu), Windows Server, Active Directory, Group Policy, Microsoft Intune

Security Concepts: Access control, authentication, cryptography basics, incident response

PROJECTS

Home SOC Lab: Built and ran a virtual SOC (Kali Linux + Windows), simulating brute-force logins and port scans. Reviewed Splunk authentication logs, correlated activity across sources, and triaged IOCs Tier-1 style, cross-checking host and network activity to separate false positives from real events.

Network Infrastructure Lab: Configured VLAN segmentation, NAT/DHCP, and Cisco routing across a multi-subnet lab built on physical hardware; validated behavior and troubleshooted routing issues using Wireshark and direct console access through the router and switch.

Vulnerability Assessment & Forensics: Ran Nessus scans and ranked findings by severity/exploitability. Examined disk images, file systems, and registry artifacts using FTK Imager and OSForensics.

PROFESSIONAL EXPERIENCE

Independent IT & Cybersecurity Support - Freelance

Sykesville, MD | 2024–Present

- Provide on-demand IT and cybersecurity troubleshooting for a small business across Windows and macOS environments, using Quick Assist, Remote Desktop, Screen Sharing, AnyDesk, and TeamViewer.
- Walk clients through remediation for account access issues, performance problems, and suspected security events. Assist with secure configurations, hardening, and incident response guidance.

Carroll County Public Schools - Technology Services

Help Desk / IT Support Technician | 2026

- Resolved MFA resets, account lockouts, and password issues for staff and students using Active Directory, auditing account access across the district.
- Handled help desk ticket volume across 43 school sites, walking users through fixes by phone and remote tools like Quick Assist.
- Independently led rollout at multiple district sites, deploying 6,000+ new devices for 2026-2027 and reimaging 1,000+ devices with updated Intune/SCCM security policies and compliance cycles.
- Managed end-of-life device transitions, including wiping, staging, and inventory-auditing retired hardware, while configuring new systems for handoff.

Baltimore County Public Schools

Preschool Teacher | 2022–2024

- Kept a structured, high-responsibility environment running smoothly under time-sensitive conditions, with consistent procedures and behavioral monitoring.
- Communicated clearly with staff and families, often needing fast, calm decision-making.

CERTIFICATIONS

- CompTIA Security+ (SY0-701) - August 2026
- SOC Operations Analyst I (SOCOA I) - BCR Cyber (2025)

EDUCATION

- Associate of Applied Science in Cybersecurity - Carroll Community College (Expected 2026), GPA: 3.96
